Project Title 1

Demonstrate in this description the skills of a programmer such as having commitment, having perseverance and accepting alternative solutions. Remember that being a portfolio you are not selling the project, you are selling yourself, it reflects the resources used: frameworks, libraries, platforms, etc.

CONTACT

[Put your call to action here]

[Call to Action](#)

© 2021 - Template developed by: [Sergio Ramirez](#)

[View](#) [5,174](#) [Star](#) [10,000](#)

1. On clicking on KNOW MORE at the top of the portfolio, scroll down to About section
2. Project listing should read data (saved at frontend) and list them dynamically in HTML
3. Show only the first 3 lines of the description with ... while listing.
4. On clicking on a project, open the project in a new modal(popover) with the image first, then the title, and then the description.
5. For call to action, add whatsapp and email icons, on click, open WhatsApp or send an email in the browser respectively. (just opening whatsapp / email, no need for further functionality)
6. At bottom, add your social media icons and linked them to your social media accounts

Description:

On sign up (registering user), take user to complete user profile. Update user portfolio which consists of projects, experience, education, skills.

Needs CRUD for all sections / user profile complete update is required

There are three main parts

Project Module:

1. Implement CRUD for projects section,
 - a. Add new project,
 - b. Update project,
 - c. Read
 - d. Delete new project
2. Further project may also have following sections,
 - a. Technology / Framework
 - b. Languages
 - c. Tags
3. Projects may be searchable using above sections

User Module:

1. Implement CRUD for users section
 - a. Add new user
 - b. Update user
 - c. Read

- d. Delete new user
- 2. Further user may have roles
 - a. Admin
 - b. User
- 3. Users may be searchable using name, email, telephone number

Auth Module:

Add auth functionality, by default user sign up with user role. With user role, user can manage his own portfolio.

If user is admin, he should have ^{2 navigations} 3 navigations, users ^{User Module} (~~can view all users and search them~~), projects (~~can view all projects~~), portfolios (~~can view all portfolios and search~~)
^{Can view and search projects based on Title, description, frameworks, languages, tags}
Admin can also create user(Admin / user) .

In case of any query, feel free to ask me or Umer
